INTRODUCTION

Greatfish Girls High, established in 2022, is a beacon of educational excellence located at the 135km peg along the Harare-Nyamapanda road, just before Mutoko Centre. To reach our campus, turn right at the Energy Park Service Station and drive 800 meters to the green roofed school, where a world of opportunities awaits.

At Greatfish Girls High, we offer classes from Form 1 to Form 4, we are proud to foster a supportive learning environment where students can grow and excel without the pressure of exams defining their progress. As we have not yet had an exam class, we do not have a pass rate to share. Instead, we focus on holistic education, personal development, and building a strong foundation for future success.

Our emphasis is on nurturing a love for learning, critical thinking, and character development, preparing our students for the academic challenges that lie ahead. Our school prides itself on sustainability, with a solar electrification system and borehole water supply ensuring a green footprint. The Agriculture Department, in collaboration with students, spearheads various meat and vegetable projects, promoting hands-on learning and self-sufficiency.

At Greatfish Girls High, camaraderie is cultivated through shared dormitories accommodating four girls each. Our agile and effective management ensures a conducive learning environment. We currently offer ZIMSEC curriculum and have plans to introduce Cambridge curriculum in 2026, providing a holistic education for our students.

With two dorm houses, each overseen by a matron and house parent, we prioritize the well-being and development of every girl. Our commitment to nurturing character extends beyond academics; students attend the United Methodist Church every Sunday, actively engaging in church activities to foster Ubuntu values and a sense of community.

Fees Structure
